## PROFESSIONAL SUMMARY

Informatics fresh graduate (GPA 3.81, Cum Laude) aiming to become a data analyst. Experienced in handling data end to end, from cleaning, EDA, and visualization to statistical testing, using Python, SQL, Excel, and Tableau, through a thesis on image classification (CNN + Vision Transformer) and an e-commerce sales analysis. Complemented by training and certifications in data analytics, Python, SQL, Excel, and Google Analytics.

## PROJECTS

**Analisis Penjualan E-Commerce (Data Dummy)** *Independent Project | Sep 2026*

- Performed exploratory data analysis on 1,500 transactions from 400 customers using Python (pandas, matplotlib): monthly revenue trends, best-selling products, regional performance, and customer segmentation.
- Documented the entire analysis in a notebook and published it as an open portfolio at github.com/vayazabrina/analisis-penjualan-ecommerce-dummy.

**Coffee Bean Roast Level Classification Using a Hybrid Convolutional Neural Network and Vision Transformer Model** *Thesis | Jun 2026*

- Built a hybrid model (MobileNetV2 + parallel CNN & ViT branches) that raised accuracy from 96.96% to 97.34% over the baseline.
- Managed the end-to-end pipeline: preprocessing and augmentation of 2,640 images, two-stage training, and confusion matrix evaluation.
- Statistically validated the performance improvement using a Paired Sample T-Test.

**Web-Based Sports Hall Rental System (GOR Alkadi)** *Team Project | Apr 2025 – Aug 2026*

- Led requirements gathering directly with the client (the sports hall owner); defined 18 functional and 11 non-functional requirements, the system architecture, and the Work Breakdown Structure (WBS).
- Testing results: average System Usability Scale (SUS) score of 84 and all Blackbox Testing scenarios passed. The system was formally handed over to the client.

## EXPERIENCE

**Frontend Web Developer** *ASCEE | Sep 2025 – Dec 2025*

- Built the frontend for two organizational websites using Laravel, PHP, HTML, and CSS: a journal submission system (reviewer module and user access management) and the SAIN IJAIN conference information system (participant registration module and admin content management).
- Designed a responsive, easy-to-use UI/UX together with the backend team and designers, using Git/GitHub for version control.

**Event Staff (Freelance)** *ASCEE | Oct 2025*

- Managed participants and served as MC during the 3-day "2025 Journal Editor Coaching & Workshop: How to Elevate a Scientific Journal to be Reputable Indexed Journal" (15+ participants from UIN Raden Mas Said Surakarta), from hotel check-in to on-site participant arrangements.
- Designed the event banner and certificates for participants and the organizing committee.

**Teaching Assistant - Artificial Intelligence & Algorithm Strategy** *Universitas Ahmad Dahlan | Apr 2025 – Aug 2025*

- Assisted lab sessions for Artificial Intelligence and Algorithm Strategy for one semester, guiding students through case studies and reviewing and grading lab work.
- Acted as the liaison between the lecturer and students on technical issues, speeding up problem resolution during lab sessions.

**General Treasurer** *Dewan Perwakilan Mahasiswa (DPM) FTI | Jan 2024 – Feb 2025*

- Prepared the Budget Plan (RAB) and Accountability Reports (LPJ) for all DPM work programs and managed the organization's cash.
- Reviewed and supervised the RAB and LPJ of faculty-level work programs, coordinating regularly with the BEM and HMPS treasurers to maintain budget accountability across organizations.

**Mentor, P2K Committee (University Orientation Program)** *Universitas Ahmad Dahlan | Sep 2023*

- Led and mentored a group of new students throughout the orientation period, including managing attendance and ensuring all group members participated actively.
- Guided the group in completing orientation assignments, including producing an introduction video that won the Best Video award among all mentor groups.

---

## EDUCATION

### B. Sc. in Informatics - Universitas Ahmad Dahlan *Yogyakarta | Sep 2022 – Jul 2026*

- Graduated Cum Laude with a GPA of 3.81/4.00, completed in 3 years and 10 months.
- Relevant coursework: Machine Learning, Computer Vision, Web Programming, Database Systems.

---

## SKILLS

- Data Analysis: SQL, Excel, Python (pandas, matplotlib), Tableau, Google Analytics (GA4), Google Sheets, Data Cleaning, EDA, Data Visualization
- Machine Learning: TensorFlow/Keras, CNN, Vision Transformer, Model Evaluation, Statistical Testing
- Systems Analysis & Design: Requirements Analysis, System Architecture, WBS, UAT/SUS, Blackbox Testing
- Web & Tools: Laravel, PHP, HTML/CSS, Git/GitHub, VS Code, Jupyter/Google Colab
- Languages: Indonesian, English (ADEPT 546)

---

## CERTIFICATIONS & TRAINING

- Data Analytics Essentials, Cisco Networking Academy (2026)
- Data Analysis with Python and Pandas, LinkedIn Learning (2026)
- Learning SQL Programming, LinkedIn Learning (2026)
- Excel Essential Training (Microsoft 365), LinkedIn Learning (2026)
- Google Analytics Certification, Google Skillshop (2026)
- Ahmad Dahlan English Proficiency Test (ADEPT) — Skor 546 (2026)
