PROFILE SUMMARY

Fresh graduate in Informatics (GPA 3.81/4.00, Cum Laude) with a focus on data analysis and machine learning. Skilled in end-to-end data handling, from data cleaning and exploratory data analysis to visualization and modeling, using Python, SQL, Excel, and Tableau. Proven through an e-commerce data analysis project and a thesis on image classification based on hybrid CNN & Vision Transformer. Certified in Cisco Data Analytics Essentials and Google Analytics, with cross-functional experience as a teaching assistant, web developer, and student organization treasurer that sharpened attention to detail and time management.

EXPERIENCE

Teaching Assist - Artificial Intelligence & Algorithm Strategy

Universitas Ahmad Dahlan | Apr 2025 - Agu 2025

- Supported lab sessions for two courses (Artificial Intelligence and Algorithm Strategy) for one semester, helping students understand the implementation of AI algorithms and problem-solving strategies (divide and conquer, greedy, dynamic programming, backtracking).
- Guided students in completing case studies and lab assignments, explaining challenging concepts through hands-on examples and real-world applications.
- Reviewed and graded students' lab work, ensuring conceptual understanding was reflected in their code implementation.
- Acted as a liaison between the course lecturer and students on technical issues, speeding up problem resolution during lab sessions.

Frontend Web Developer

ASCEE | Sep 2025 - Des 2025

- Supported lab sessions for two courses (Artificial Intelligence and Algorithm Strategy) for one semester, helping students understand the implementation of AI algorithms and problem-solving strategies (divide and conquer, greedy, dynamic programming, backtracking).
- Guided students in completing case studies and lab assignments, explaining challenging concepts through hands-on examples and real-world applications.
- Reviewed and graded students' lab work, ensuring conceptual understanding was reflected in their code implementation.
- Acted as a liaison between the course lecturer and students on technical issues, speeding up problem resolution during lab sessions.

General Treasurer

Dewan Perwakilan Mahasiswa (DPM) FTI | Jan 2024 - Feb 2025

- Supported lab sessions for two courses (Artificial Intelligence and Algorithm Strategy) for one semester, helping students understand the implementation of AI algorithms and problem-solving strategies (divide and conquer, greedy, dynamic programming, backtracking).
- Guided students in completing case studies and lab assignments, explaining challenging concepts through hands-on examples and real-world applications.
- Reviewed and graded students' lab work, ensuring conceptual understanding was reflected in their code implementation.
- Acted as a liaison between the course lecturer and students on technical issues, speeding up problem resolution during lab sessions.

Mentor, P2K Committee (University Orientation Program) Universitas Ahmad Dahlan | Sep 2023

- Led and mentored a group of new students throughout the orientation period, including managing attendance and ensuring active participation from all group members.
- Guided the group in completing orientation assignments, including producing an introduction video that won the Best Video award among all mentor groups.
- Taught new students how to prepare structured daily activity reports.

PROJECTS

Hybrid Convolution Neural Network dan Vision Transformer Model for Coffee Bean Roasting Level Classification

Skripsi | Jun 2026

- Developed a hybrid architecture (MobileNetV2 as backbone, with parallel CNN and Vision Transformer branches) that achieved superior classification performance compared to the MobileNetV2 baseline model.
- Managed the entire data science pipeline end-to-end: dataset preprocessing and augmentation (2,640 images), two-stage model training, and evaluation using a confusion matrix.
- Statistically validated the significance of the model's performance improvement using a Paired Sample T-Test, ensuring the results were backed by scientific evidence rather than chance.

E-Commerce Sales Analysis (Dummy Data)

Proyek Mandiri | Sep 2026

- Conducted exploratory data analysis on 1,500 transactions from 400 customers using Python (pandas, matplotlib) to uncover sales patterns not visible from the raw data.
 - Identified monthly revenue trends, best-selling categories/products, regional sales performance, and customer segmentation based on total spending, generating insights relevant to sales strategy decisions.
 - Documented the entire analysis process in a notebook and published it as an open portfolio at github.com/vayazabrina/analisis-penjualan-ecommerce-dummy.
-

PENDIDIKAN

SI Informatika - Universitas Ahmad Dahlan

Yogyakarta | Sep 2022 - Jul 2026

- Graduated Cum Laude with a GPA of 3.81/4.00, completed in 3 years and 10 months.
 - Relevant coursework: Machine Learning, Computer Vision, Web Programming, Database Systems.
-

KEAHLIAN

- Data Analysis & Tools: SQL, Microsoft Excel, Tableau, Google Analytics (GA4), Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization
 - Programming & Machine Learning: Python (pandas, matplotlib), TensorFlow/Keras, CNN, Vision Transformer, Model Evaluation, Statistical Testing
 - Web Development: Laravel, PHP, HTML, CSS
 - Tools: VS Code, Jupyter Notebook/Google Colab, Git, GitHub, Microsoft Excel, Google Sheets
 - Soft Skills: Analytical Thinking, Attention to Detail, Time Management, Leadership, Teamwork, Communication
-

SERTIFIKASI

- Data Analytics Essentials — Cisco Networking Academy (2026)
- Google Analytics Certification — Skillshop (2026)
- Ahmad Dahlan English Proficiency Test (ADEPT) — Scor 546 (2026)
